Ronnie,

We stopped cleaning 80-15 and labeled as complete because we couldn't get any more solids out of the tank. However, the vendor proposed using a different piece of equipment with extended reach and more pressure, so we gave it a try. That's when we re-labeled it to green vs. blue, because we were still working on it.

Brent,

Thanks again for the table. I do have a question regarding today's table. In today's table, it states cleaning in progress – additional solids removal in progress for Tank 80-15. However, the 4/15 table states that tank 80-15 is COMPLETE – no further action required. Can you verify that 80-15 is still being cleaned?

Thanks,
Ronnie
